14' L

## 5 Second Operation

SidelinER can be operated up and down in 5 seconds or less once in position, and can be set up in under a minute.

## Patented Hubs

Powder Coated Stainless Steel

## FAQs

1. Two sand bags are included with each SidelinER® to secure your unit. Instructions for placing those can be found in the Set Up Instructions on our Customer Service page.
2. If SidelinER® is used during rainy weather or a heavy morning dew, it should be set up on the next sunny day to dry out. Storing wet fabrics in an enclosed container for an extended period of time. Failure to follow protocol could cause mildew.
3. SidelinER® covers are water-resistant. While others in the shelter industry claim to be waterproof, all fabrics will absorb some moisture when under prolonged exposure to heavy rains. We use DWR coated fabrics and bonded threads in all seams to help your cover stand up to the elements.

4. Care for the cover and branded panels is as follows:  
**BRANDED PANELS:** Wash on the gentle cycle in cold water. Tumble dry on low heat. DO NOT DRY CLEAN.

**COVER:** Use soap and water or a light detergent to hand wash. DO NOT PUT COVER THROUGH THE WASH OR DRY CLEAN.

5. SidelinER® hub pins should be used only when sand bags are not available. Additionally, we recommend the SidelinER® cover be removed before frame take down.

# SIDELINER® PRO

## FAQs

1. Never slide the travel duffel across rough terrain. That can cause tearing.
2. The Footprint and Rainfly currently do not fit in the hard case.
3. The Rainfly cannot be purchased separately from the Footprint.

## Accessories and Customization

Customize and accessorize your SidelinER® PRO with our offering of cover colors and optional accessories.

### Optional Accessories

#### Travel Duffel

The **Travel Duffel** (made with a durable vinyl-backed canvas material) is designed specifically to transport SidelinER®. Uniquely positioned handles on the ends make team lifts more efficient.

#### Hard Travel Case

For added protection a durable, wheeled **Hard Travel Case** is available for purchase.

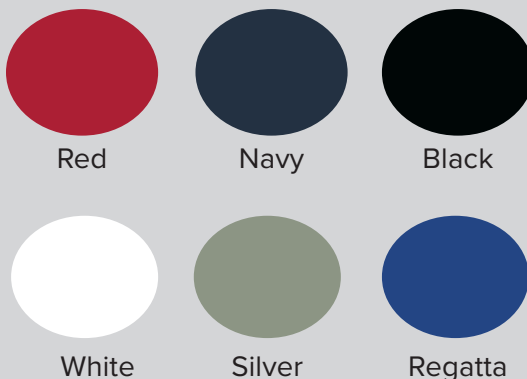

#### Footprint and Rainfly

The **Footprint** (made out of Vipol Mesh) lays out the space requirements for the SidelinER® and helps with sideline organization. A chain is sewn around the edges to help it lay flat and prevent moving during wind.

The **Rainfly** (made out of heavyweight vinyl) attaches to the Footprint and is used to cover the unit while in the lowered position. This prevents rainwater from pooling on the medical tent then drenching the exam area when raised.

### Available Cover Colors

In 2019, six cover color options are available.

For more customization options visit the next page to learn about branded panels.

# Branding SidelinER® PRO

**CUSTOMIZATION and REVENUE GENERATION.** Adding the removable panels to a SidelinER® creates unique customization and marketing opportunities allowing your brand to pop on the sidelines. Our panel creation process allows us to print as many logos and colors as you prefer at no additional cost. Panels can greatly change the overall look of a cover, especially when specific school colors cannot be matched by the cover color options.

Branded panels also provide unique revenue generation that you may want to take advantage of. Consider speaking with sponsors and/or booster clubs to offer this eye-catching opportunity and help the unit pay for itself.

Top Branded Panel

## Accepted Logo Files

High resolution vector images are required for printing on branded panels. **Accepted files include: .ai, .eps, .psd, and .pdf.**

Kinematic Sports offers a third party design service for a small additional fee that can recreate existing low-res files into a proper vector image. In addition to being used for panel printing, KS will provide you with the new vector logo file for any future use.

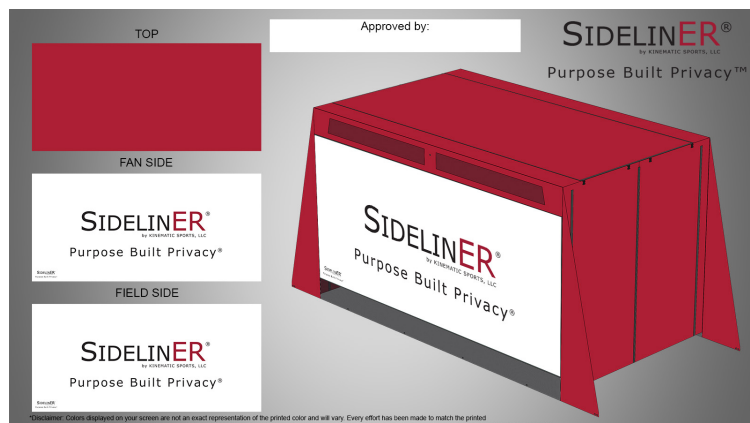

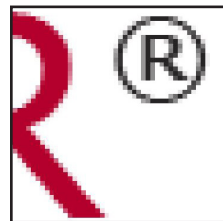

### EXAMPLE: Resolution Issues

A true vector image appears clear. A non-vector image appears grainy when the size is increased for panel printing.

Vector

Non-Vector

**EXAMPLE: Rendering with required signature box in top center.**

## FAQs

1. Saving a .jpeg or .png as a vector file extension does not mean it will be acceptable for printing.

2. SidelinER® PRO 7'x14' can accommodate 3 panels (Sides and Top). The 5'x12' model has space for 2 side panels only.

3. Kinematic uses a state of the art digital printing process. This means branding will not flake or peel.

4. Kinematic provides unlimited renderings during the design process. A \$30 fee, however is added to every rendering after the fourth.

5. A signed copy of the approved rendering is required to move a unit into production. See left for example.

## Commonly Asked Questions

### **How long does a SidelinER® take to deliver?**

Branded panels, cover, and frame take five business days to ship based on availability at time of purchase.

### **Does SidelinER® have a warranty?**

Yes. There is a 1-Year Limited Warranty that covers manufacturer defects. The warranty does not cover general wear and tear.

### **Can branding be purchased separately?**

Yes. Branding can be purchased at a later time than the unit purchase is made.

### **Is volume discount pricing available?**

Purchases of 10 units or more can qualify for a volume discount. Speak with a Kinematic Sports rep for details.

### **What are the size options for SidelinER® PRO in 2019?**

SidelinER® PRO is available as a 7'x14' or 5'x12' unit.

### **How do I repair my frame or get replacement parts?**

SidelinER® is designed to be repaired on the field by one or two people with minimal tools. Replacement parts can be purchased through Kinematic Sports. Email [info@kinematicsports.com](mailto:info@kinematicsports.com) for more information.

### **How do I repair a torn cover?**

Email [info@kinematicsports.com](mailto:info@kinematicsports.com) for next steps on cover repair.
